Hygienic Machine.

KR AGILUS Hygienic Machine

THE HYGIENE CONCEPT: The robot's design and materials allow it to be used in applications involving direct contact with food-stuffs and pharmaceutical substances. Corrosion-resistant surfaces, food-compatible lubricants and stainless steel parts ensure the highest level of hygiene.

EASY TO CLEAN: Thanks to its hygienic design, deposits cannot form on the surface or screws of the six-axis robot. The cleaning-sensitive electrical interface is not located in the primary contact area but rather underneath the robot. Cleaning is possible using industry-standard cleaning agents as well as high pressure.

The interface plate underneath the KR AGILUS HM-SC

- 1 Resolver input for axis 7
- 2 Resolver input for axis 8
- 3 Pneumatic connections (Air 1, Air 2, **compressed air**)
- 4 Extension Interface (100 MBit)
- 5 Motor connector
- 6 Interface connection
